## tiles

**Snap and Lock** – Tiles snap-in-place and self-lock... tiles are removed only when you want them removed.

**Durability** – All steel construction can withstand abuse and allows for repair.

**Sewn Fabric** – Not glued; field replaceable; recyclable.

**Highest Acoustic Rating** – NRC (noise reduction coefficient) = .95

## frames

**Installer Friendly** – Frames attach using a single draw-rod system. Installation is quick and easy.

**Solid Steel Construction** – Frames are factory welded for light weight strength and rigidity.

## top caps and end caps

**Steel Construction** – Secured with bolts; no service calls for replacement.

## power & voice/data cables

**Lay-in Cabling** – 3/4" space between frame and tile facilitates our exclusive lay-in feature; no fishing cables through holes, no need for troublesome raceways.

**Terminate Power and Voice/Data Anywhere** – Another Simon exclusive.

**Power Poles** – Integrate beautifully into top of panel at almost any location. Dual chamber - high capacity. Simultaneous capacity: 6 electrical feeds, 180 voice/data cables.

## environmentally friendly

**Sustainability** – Simon is constructed of heavy gauge domestic steel and is therefore recyclable.

**Sewn Construction** – All fabric tiles are adhesive free and therefore emit no fumes at the factory or the installation site. This unique upholstery technique allows for simple material separation for re-upholstery or recycling.

**Low Waste Manufacturing Process** – Every pound of steel scrap generated in fabricating Simon is recycled. Remnant upholstery materials are used for acoustic pillows.

## installation support

**Dedicated Factory Support** – Customer requested field changes and punch lists are handled quickly.

**Detailed Installation Drawings** – Shipped with each order.

**Accessibility** – Factory personnel always available to train your installers.

## legacy integration / scalability

**Engineered to Integrate with Most Panel Systems** – Use as a spine on legacy systems to create a low cost upgrade to an existing job.

**Low Cost Tile Options** – To fit in any budget.

The **Simon Series™ Panel System** from McDowell-Craig is a true stand out among tiled panel systems. The first of its kind to offer true lay-in cable capability, all-steel tile construction and the highest acoustic rating available at a .95 NRC.

## features

### tiles

Installer friendly, factory assembled tiles go straight from the shipping box to the frame with a simple snap-in-place attachment system. All steel construction can withstand abuse and allows for field repair. Sewn construction allows for field replacement of tile fabric and recycling of discarded material. Simon tiles provide the highest acoustic rating available with a Noise Reduction Coefficient of .95.

### open design internal frames

Simon frames are designed to adapt to emerging technologies. One key component to this premise is true lay-in cabling ability accommodated by a large spacing between frame and tile. This open design allows power and voice/data to terminate anywhere within the system making Simon equally effective on installations that have minimal or very high technological demands. In addition, the all-steel construction of these frames provides a rock-solid foundation for worksurfaces and panel mounted storage bins.

### trim

Steel constructed and secured with bolts, standard Simon top caps and end caps are engineered for high use without service calls for replacement.

### panel mounted storage

Panel mounted storage bins are a versatile solution for quick reference storage. Panel mounted storage bins are available in enamel and feature an optional lock.

### under-worksurface storage

McDowell-Craig's 65-plus year reputation for quality has always been spear-headed by the highest quality storage and filing available. This reputation for quality is clearly seen in the Simon pedestals and S Series lateral files. Built to last a lifetime, these products are engineered to remain square, and in excellent working condition for decades.

### keyboards and accessories

A wide variety of keyboard arms and platforms facilitate correct ergonomic configurations and are completely compatible with Simon worksurface configurations.

### environmentally friendly

Simon Series frames, tiles and components are constructed of heavy gauge domestic steel and are 100% recyclable. All fabric tiles are adhesive free and emit no fumes at the factory or the installation site. This unique upholstery technique allows for simple material separation during re-upholstery or recycling. Every pound of steel scrap used in fabricating Simon is recycled. In addition, remnant upholstery materials are utilized for making acoustic pillows, used in conjunction with super acoustic tiles.

## finishes

### coatings

**Standard Coating** — Simon Series frames, tiles, connectors, storage bins, open shelves, pedestals, and components are available in a variety of coatings.

**Special Coating** — Simon Series tiles, connectors, storage bins, open shelves, pedestals, and components may be ordered in factory approved special coatings — add 8% to price of unit (e.g. pedestals, tiles, etc.) + \$1,363 set-up and mixing charge per color per order. Note: Written factory approval must accompany your purchase order.

### laminates

**Standard Laminates** — A variety of laminate patterns, solids, textures, metallic and wood grains are available.

See *McDowell-Craig Plastic Laminates Selection Guide* for standard selections.

**Special Laminates** — Simon Series worksurfaces may also be ordered with special laminates — add 8% to price of unit (e.g. worksurfaces) + \$841 per laminate pattern per order. Note: Written factory approval must accompany your purchase order.

### fabrics

All fabric pricing for tiles is based on Grade I fabrics. See *McDowell-Craig Fabric Selection Guide*.

For other Grade I fabrics add 8% to price of unit (e.g. tile, tackboard) + \$299 per fabric pattern per order.

single-sided

**enamel/coated – “E”**

Enamel/coated tiles are economical and easy to clean. Best choice for going against walls. Available in multiple colors.

**fabric – “F”**

Fabric tiles are fully recyclable, sewn constructed grade I fabric over coated finished steel tile. Available in multiple standard fabrics, see *Fabric Selection Guide*.

**acoustic – “A”**

Acoustic tiles are tackable, sewn constructed grade I fabric over coated finished steel tile with sound deadening acoustical insert. NRC rating of .60. Available in multiple standard fabrics, see *Fabric Selection Guide*.

**laminate – “L”**

Laminate tiles are vertical grade laminate over coated finished steel tile. Good choice for high traffic areas. Easy to clean. Available in multiple standard laminates, see *Laminate Selection Guide*.

2-sided  
specify inside only**plexiglass, frosted – “R”**

Single pane, 1/4" frosted plexiglass with architectural glass-like tint. Available in multiple colors.

**plexiglass, clear – “C”**

Single pane, 1/4" clear plexiglass. Trim available in multiple colors.

## specialty tiles

**marker board tile – “M”**

Marker board laminate over enamel finished steel tile.

Price as an acoustic tile (“A”).

**open frame – “O”**

Complete finished component of a Simon frame. Trim available in multiple colors. Price as a clear plexi tile “C”.

## panel specification

**step 1: panel dimension** - determine panel height and width

**step 2: tile configuration** - select inside and outside tile configuration and then place tiles in the desired order (see charts below)

**step 3: tile types** - determine tile type for inside and outside of panel (see pp 6-7)

**step 4: panel price** - use the panel component charts (see pp 11-17) to find the appropriate pricing

### step 1 – panel dimensions

#### panel size chart

Simon panels: height in 7" increments  
and width in 6" increments.

**minimum size:** 35" h x 20" w

**maximum size:** 105" h x 54" w

### step 2 – tile configuration

#### tile size chart

Heights: 7", 14", 21", 28" and 35".

Tile #: based on it's multiple of 7.

**example:**  $35 \div 7 = 5$

#### inside & outside tiles – unequal:

#### placing tiles and specifying panel number

Use the tile # (1 thru 5) to configure the tile array of a panel.

**example:** 63" high x 24" wide panel model number...

inside & outside tiles – equal:

placing tiles and specifying panel number

Use the tile # (1 thru 5) to configure the tile array of a panel.

example: 63" high x 24" wide panel model number...

"D" stands for double and signifies that the inside tile configuration equals the outside tile configuration.

### step 3 – tile types

specifying tiles

Add the letter values (E, F, A, etc.) to the corresponding tile number.

example: 63" high x 24" wide panel model number...

2-sided tiles – specify inside only

Model #	w	h	lbs	"E" Enamel	"F" Fabric	"A" Acoustic	"S" Acoustic+	"L" Laminate	"N" None	"R" Frosted	"C" Clear Plexi
T-0724_	24"	7"=1	2	\$42	\$55	\$74	\$78	\$58	N/C	\$260	\$218

**S6324 4 F 3 A 2 A 5 E 4 E**

fabric    acoustic    enamel

### step 4 – pricing

specifying panel price

Use the panel component charts (see pp 7-13) to find the appropriate pricing.

example: 63" high x 24" wide panel model #S6324 – 4F3A2A – 5E4E

24" wide frames

Model #	w	h	lbs	list price
S3524	24"	35"	13	\$228
S4224	24"	42"	15	258
S4924	24"	49"	16	296
S5624	24"	56"	18	316
<b>S6324</b>	24"	63"	21	<b>365</b>
S7024	24"	70"	23	422

24" wide tiles

Model #	w	h	lbs	"E" Enamel	"F" Fabric	"A" Acoustic
T-0724_	24"	7"=1	2	\$42	\$55	\$74
T-1424_	24"	14"=2	4	58	83	<b>115</b>
T-2124_	24"	21"=3	6	78	104	<b>151</b>
T-2824_	24"	28"=4	7	<b>91</b>	<b>133</b>	193
T-3524_	24"	35"=5	9	<b>113</b>	166	250

**S6324 4F 3A 2A 5E 4E**

\$365    \$133    \$151    \$115    \$113    \$91    **total = \$968**

### step 5 – description

describe the final panel

example: panel model #S6324 – 4F3A2A – 5E4E

description → 63" h x 24" w panel

### single sided returns –

A straight run of Simon panels can extend up to 12' when supported at both ends by 36" (minimum) return panels. Return panels must be the same height as the panel run. *See example.*

A longer run of Simon panels can be specified with the use of a 54" (minimum) opposing center panel. *See example.*

### perpendicular panel runs –

A perpendicular run of Simon panels may not exceed 8' without an additional return panel. *See example.*

### opposing returns –

A straight run of Simon panels can extend up to 12' when supported at both ends by 24" (minimum) opposing return panels. Return panel height must be within 48" of the panel run height. *See example.*

price list #40 – simon frame and tile system

### ordering frames separately

Simon panel frames can be ordered individually. When ordering frames you must indicate crossmember locations. Each crossmember corresponds to a tile "grout line." Use the guidelines below to determine locations.

#### step 1 – determine crossmember locations

**example:** 63" high x 24" wide panel. Starting from the bottom of the panel, list the smallest tile number from both sides, then the sum of the 2nd, then the sum of the 3rd, etc.

#### step 2 – determine model number and pricing

Use the frame pricing and model number (see pp 11-17) and add the crossmember locations as a suffix to the frame number.

**example:** 63" high x 24" wide panel:

frame number (pp 11-17)      crossmember locations (see above example)      frame price (pp 11-17)

model #: S6324 – 1 4 5 7 = \$308

**Note:** if additional crossmembers are required for field changes to tile size or locations, order using the following chart:

Model #	w (panel width)	list price
FCM-20	20"	\$70
FCM-24	24"	77
FCM-30	30"	82
FCM-36	36"	85
FCM-42	42"	90
FCM-48	48"	94
FCM-54	54"	98

## ordering tiles separately

Simon tiles can be ordered individually. When ordering tiles you must indicate size, finish and knock-out locations (if needed). Use the guidelines below.

### step 1 – determine tile dimensions

example: 63" high x 24" wide panel: inside/middle tile with bottom knock-outs

### step 2 – determine tile type

Select tiles from those listed on pp 6-7.

### step 3 – add knock-outs (if needed)

If power/data knock-outs are required, select a configuration from those listed on page 31.

### step 4 – determine model number and pricing

Use the tile model number (see pp 11-17) and add the type and knock-outs (if needed) as a suffix to complete the model number.

example: 63" high x 24" wide panel: inside/middle tile with bottom knock-outs

tile number (page 12)	type = acoustic (see above example)	with bottom knock-outs (page 31)	tile price + (page 12)	2ea. bezels (page 30)
<p>model #: T-2124A – KO-B = \$151 + \$28 + \$28 = \$207</p>				

please specify:  
• coating color

top caps

Simon top caps are standard with 22GA cold-rolled steel and enamel finish per specification. Top caps fasten to the top side of the internal frame structure with the provided steel bolts. Contact us for a list of available colors. Simon top caps are 3-7/8" wide x 5/8" high x specified length (see below):

**flush** – Panel width.

Model #	w	lbs	list price
TC-20	20"	2	\$20
TC-24	24"	2	28

**wall starter** — Connects a Simon panel to a wall. Coating finished.

**universal connector** — Connects to a Simon panel at any point along a panel run.

Screws fit through tile "grout line" and into frame. Tiles must be affixed to frame before installing universal connector. Coating finished.

**wall start fasteners (toggles)** — mount wall starter to standard dry-wall.

**wall bracket** — mounts to top, bottom or crossmember of frame with sheet metal screws - then to wall. Intended as a supplemental field support for long or unsupported panel runs. Adjustable 0-3" panel to wall.

### Simon electrical system

The Simon electrical system is a 20 amp system allowing the use of 4 circuits with 4 line conductors, 2 neutrals and 2 grounds. Under NEC recommendations, 13 receptacles may be used per circuit, with a total of 52 available receptacles if all circuits are used, per single power entry. The Simon electrical system can be wired in both single phase 208/120V, and three phase 240/120V configurations.

At the heart of the Simon electrical system is the unique six point contact terminal. This quad terminal is rated at over 50 amps, offering built in overload insurance. Its unique design distributes the power, reducing the number of internal connection points. The six points of contact provide a stable connection, eliminating rocking.

All connections are positive locking, assured by keyed terminal housings. The patented slide mount is easily installed on site after frame assembly. Receptacles simply snap in with a positive locking tab feature that assures positive contact to the power blocks. Furthermore, harnesses and receptacles are installed without tools.

- UL listings 1286 and 183
- CSA Standard C22.2 No. 203
- 8-wire 20-amp 4-circuit system

#### specifying Simon electrical – step by step

**step 1** – determine circuit configuration (see diagrams below)

- 3+1 configuration – 3 utility circuits and 1 isolated/dedicated circuit
- 2+2 configuration – 2 utility circuits and 2 isolated circuit
- (for other circuit configurations, please contact factory)

**step 2** – determine location, quantity and circuit numbers of duplex receptacles

**step 3** – determine appropriate use of isolated and separate neutral circuits

**step 4** – determine location(s) and type of power feed

**step 5** – specify appropriate electrical components (see diagrams below)

**four circuit, 3+1 receptacle configuration** – 3+1 configuration provides three utility circuits and one isolated circuit for more sensitive equipment. Note: with this configuration, circuit 2 cannot be used with single-phase building electrical supply.

**four circuit, 2+2 receptacle configuration** – 2+2 configuration provides two utility circuits and two isolated circuit for heavy computer usage.

- model number
- circuit configuration

M = male connection  
F = female connection

**junction blocks –**

double sided. Attaches to Simon frames and allows for placement of duplex receptacle(s).

**jumper cable –**

cable with double female ends for connecting junction blocks.

**20" frame jumper cable –**

cable with double female ends for connecting junction blocks.

**pass-thru cable –**

free-floating cable that passes power thru a panel that does not contain duplex receptacles.

**15 AMP duplex receptacle –**

3+1 configuration = 3 utility circuits and 1 isolated/dedicated (computer) circuit.

2+2 configuration = 2 utility circuits and 2 isolated circuits. Snaps into junction block. Standard in textured black.

**power feeds****base/end power feed –**

liquid tight cable that connects power from building floor or wall into the Simon electrical system.

**ceiling power feed –**

field adjustable cable that connects power from ceiling area into the Simon electrical system. via our PowerTower (see page 27)

## panel weights (lbs.)

Use the size chart below to determine complete panel weight.

		panel width						
		20"	24"	30"	36"	42"	48"	54"
panel height	35"	26	31	37	44	49	57	62
	42"	30	39	44	49	59	64	73
	49"	34	42	49	57	66	73	83
	56"	38	46	57	67	77	87	97
	63"	42	53	63	75	85	93	106
	70"	47	59	69	83	93	106	116
	77"	52	64	76	90	102	114	126
	84"	57	70	82	96	110	123	137
	91"	62	73	87	103	117	133	147
	98"	67	79	94	110	124	142	156
	105"	72	84	98	118	132	151	165

example: S6354-5F4A-D = 106 lbs.

## panel weight notes

- For no tile "N" – subtract the corresponding tile weight from the panel. See individual tile weight chart (*see below*).
- Window tiles do not effect the weight of panel.
- For storage bin "B" – subtract per side specified the following:

storage bin width						
20"	24"	30"	36"	42"	48"	54"
3	4	5	6	7	7	8

example: S6354-3F3A2B-5F4A = 98 lbs. (106 - 8)

## individual tile weights (lbs.)

Use the size chart below to determine individual tile weight.

		tile width						
		20"	24"	30"	36"	42"	48"	54"
tile height	1 = 7"	2	2	2	3	4	4	4
	2 = 14"	3	4	5	6	7	7	8
	3 = 21"	5	6	7	8	10	11	13
	4 = 28"	5	7	9	11	13	15	17
	5 = 35"	7	9	11	14	16	19	21

example: T-1454F = 8 lbs.

example: T-2848AVM = 15 lbs.

## individual frame weights (lbs.)

Use the size chart below to determine individual frame weight.

		frame width						
		20"	24"	30"	36"	42"	48"	54"
frame height	35"	12	13	15	16	17	19	20
	42"	14	15	16	17	19	20	21
	49"	15	16	17	19	20	21	23
	56"	17	18	21	23	25	27	29
	63"	19	21	23	25	27	29	30
	70"	21	23	25	27	29	30	32
	77"	22	24	26	28	30	32	34
	84"	24	26	28	30	32	33	35
	91"	25	27	29	31	33	35	37
	98"	27	29	30	32	34	36	38
	105"	29	30	32	34	36	37	39

example: F-8430 = 35 lbs.

## e-lift legs

e-lift legs attach to worksurface with included mounting screws. e-lift legs come with adjustable floor glides, and adjustable height range from 24H - 50H. Coatings are limited. *Includes simple two button control.*

e-lift leg - left hand

model #	d	h	list price
2L2M	20", 24" & 30"	24" - 50"	\$1169
3L3M	20", 24" & 30"	24" - 50"	1753

e-lift leg - right hand

2L2M - 2-leg / 2 motor

e-lift leg - for l-shape desks

3L3M - 3-leg / 3 motor

## modesty shield option –

For optional 20"H modesty shield.  
List price is \$254 Dimension will be  
determined by factory.  
Model # MS-XX. Example: MS-48

# SUZY

FREESTANDING  
DESK  
SYSTEM

As a desk system, **Suzy Freestanding Modular System** from McDowell-Craig is out-of-this-world. No mere office mortal, Suzy isn't hurt by heavy usage. Steel-construction makes her an office super-hero that will serve as the basic building block of your office for years to come. Suzy intermembers seamlessly with her brother Simon . . . McDowell-Craig's state of the art frame and tile system.

## features and benefits

### support components

Pedestals, end panels, tube legs and the like are interchangeable – both functionally and dimensionally. Field changes (right to left) are quick and simple.

### super grade-A construction

McDowell-Craig's 70+ year reputation for quality is built into every Suzy component – ideal for all customers.

## standard equipment tops

Suzy tops have the same dimensions as Simon tops and are available in a wide variety of edges and shapes.

### modesty panels

Three heights and numerous widths accommodate every freestanding need.

### steel end panel

Factory assembled to Suzy tops, these heavy steel constructed end panels are the foundation of the Suzy system. Standard with adjustable glides that allow for slide-in under-worksurface storage, these panels come in 8" connector and full width varieties.

### c-legs

Suzy c-legs leave an open area below the worksurface while providing maximum top support. Like the steel end panels, c-legs come standard with adjustable floor glides that accommodate slide-in under-worksurface storage.

### under-worksurface storage

McDowell-Craig's 70+ year reputation for quality has always been spear-headed by the highest quality storage and filing available. This reputation for quality is clearly seen in the Suzy pedestals, bookcases and lateral files. Built to last a lifetime, these products are engineered to remain square, and in excellent working condition for decades. All filing can be used either as top support or slide-in options.

### hutches

Hutches mount on desks, returns or credenzas. Easily added to existing product both Suzy or Legacy. Size ranges: 36"w - 84"w. Steel constructed and bolt secured to tops, Suzy hutches are engineered for high use and flawless function. These beautifully constructed hutches come standard with brushed metal pulls and a tackboard. Suzy hutches are fully finished for open floor plans and accommodate optional under-storage task lights.

### keyboards and accessories

Keyboard arms and platforms facilitate correct ergonomic configurations and are completely compatible with Suzy configurations. Optional CPU holders and pencil drawers are excellent for organizing desktop clutter and keeping work-flow efficient.

### environmentally friendly

Suzy filing units, hutches and support components are constructed of heavy gauge domestic steel and are 100% recyclable. Every pound of steel scrap used in fabricating Suzy is recycled.

## finishes

### coatings

**Standard Coatings** — Suzy filing units, hutches and support components are available in a variety of coatings.

See *McDowell-Craig Selection Guide*.

**Special Coatings** — Suzy filing units, hutches and support components may be ordered in factory approved special coatings — add 8% to price of unit + \$1404 set-up and mixing charge per color per order.

**NOTE:** written factory approval must accompany your purchase order.

### laminates

**Standard Laminates** — A variety of laminate patterns, solids, textures, metallic and wood grains are available.

See *McDowell-Craig Plastic Laminates Selection Guide* for standard selections.

**Special Laminates** — Suzy worksurfaces may also be ordered with factory approved special laminates — add 8% to price of unit + \$866 per pattern per order. **NOTE:** written factory approval must accompany your purchase order.

### fabrics

All fabric prices for hutch tackboards are based on Grade I fabrics. See *McDowell-Craig Fabric Selection Guide*.

For other Grade I fabrics add 8% to price of unit (e.g. tile, tackboard) + \$236 per fabric.

## step-by-step

- 1) **top** - determine top shape, edge and dimensions
- 2) **top support** - select support options for both left and right side of top
- 3) **modesty panel** - select a modesty panel option
- 4) **model number and pricing** - use the selected components to build the final model number and determine pricing
- 5) **description** - top size + support + handing or double = description

## step 1 – select a top

## determine shape, edge type and size

rectangular  
(page 83)

corner  
(page 87)

"L" shaped  
(page 89)

peninsula  
(page 95)

model #	d	worksurface dep.
—4224	42"	
—4824	48"	1

## end panels

Unitized steel end panels are reversible for left- or right-hand attachment to worksurface with included mounting screws.

### end panel

model #	d	worksurface depth	lbs	list price
E20	18"	20"	18	\$360
E24	23"	24"	28	418
E30	28"	30"	33	508
E36	34"	36"	39	620

### double end panel –

adjoins two worksurfaces or supports middle of longer worksurface. Primarily used on longer returns and returns with modesty panels.

model #	lbs	list price
E8	16	\$215

## tube legs

Cylindrical steel tube legs attach to worksurface with included mounting screws. Tube legs come with adjustable floor glide(s)

### single tube leg –

attaches to unsupported end of any 20", 24" or 30" deep peninsula worksurface. May also be used to adjoin two tops or as a center support for corner tops.

model #	lbs	list price
STL	7	\$193

### double tube leg –

attaches to unsupported end of 20", 24" or 30" deep worksurface.

model #	w	lbs	list price
DTL20	20"	7	\$296
DTL24	24"	8	322
DTL30	30"	9	334

## specialty support components

### wood core clamp –

attaches two adjacent worksurfaces – primarily used for returns and short bridge tops. Medium grey.

model #	lbs	list price
WC20	3	\$68

### flat bracket –

attaches two adjacent worksurfaces – primarily used to supplement and strengthen seams. Medium grey.

model #	lbs	list price
FB-1	0.5	\$96

## c-legs

Unitized steel c-legs attach to worksurface with included mounting screws. C-legs come with adjustable floor glides.

### single c-leg

model #	d	c	lbs	list price
C20	16-1/2"	16-1/2"	12	\$312
C24	22-1/2"	16-1/2"	13	362

stackable guest seating ..... page 127

## chair upholstery

**Standard Fabrics** — A variety of quality fabrics are available. See *McDowell-Craig Fabric Selection Guide*. All fabrics meet the flammability requirements of the *California Technical Information Bulletin #117*.

**Special Fabrics** — Add \$125 per fabric per order and contact factory for individual chair pricing. Special fabric supplied by customer, add per chair: \$35.

**Vinyl** — Add \$121 per vinyl per order and add per chair: \$148. Vinyl supplied by customer, add per chair: \$97.

## leather pricing

McDowell-Craig uses only the finest upholstery grade leather as our standard.

**TC 100 and TC 400 Series** — Standard hard-shell outer-back: \$305

**TC 100 Series** — Four leg guest chairs: \$330

**Customer's own Leather (C.O.L.)** — All chairs: \$166

## chair customer's own material (C.O.M.) chart

number of chairs	fabric and vinyl		leather	
	standard	w/ upholstered back (option H)	standard	w/ upholstered back (option H)
1-5	1 yard per chair	1.5 yards per chair	.50 hide per chair	.75 hide per chair
6 +	.85 yard per chair	1.2 yards per chair	.50 hide per chair	.75 hide per chair

## arm rests

**Trek 100 and 400 Series Chairs** — standard arm pads are self-skinned urethane with integrated memory foam and a matte black textured finish.

**Trek Stackable Guest Chairs** — arm rests are integral skinned poly-urethane with a matte black textured finish.

## seats

**Trek Stackable Guest Chairs** — come standard with curved seat and back, fully upholstered over 1-1/2" thick, high-resilient foam.

**Trek 100 and 400 Series** — come standard with multiple density contoured seat cushions and integrated memory foam.

## back rests

**Trek 100 and 400 Series** — standard back rest is contoured soft density foam with additional medium density lumbar foam inserts for optimal lower back support. Hard shell outer-back.

**Trek Stackable Guest Chairs** — standard back rest is fully upholstered over 1" thick, high-resilient foam front. Back upholstery is over 1/2" thick, standard foam backing. This back rest is sculptured to fully support the back, placing extra support on the lumbar.

## steel frames

**Trek Stackable Guest Chairs** — frame is constructed of 16 gauge, 1" domestic steel tubing with high-solid, baked enamel finish.

## casters

**Dual wheel carpet casters** — come standard.

**Soft dual wheel hard floor casters** — \$35 per chair

## warranty information

**Pneumatic cylinder / chair control** — 12 years

**High wear parts (Fabric, Cushions, Casters, Arms and Glides)** — 5 years

**All other parts** — Lifetime

**product overview**

McDowell-Craig Tables may be used in a variety of office and institutional environments — such as conference areas, office workstations, classrooms, computer training and lunch rooms. Besides their versatility, these tables are built to last.

**tops**

Table tops are constructed of 1-3/16" industrial grade particle board covered with high pressure, plastic laminates, and self edged or vinyl edged.

**top laminates**

**Standard Laminates** — A variety of laminate patterns, solids, and wood grains are available. See McDowell-Craig Plastic Laminates Selection Guide for standard selections.

**Special Laminates** — Worksurfaces may be ordered with factory approved special laminates — add 8% to price of unit. + \$866 per pattern per order.

**Note:** written factory approval must accompany your order.

**base construction**

Tables are supported by rigid, steel tubular bases — engineered and manufactured to last. Each base leg includes an adjustable glide to compensate for uneven floors.

**base finishes**

**Standard Coating** — Table bases are available in a variety of color coordinated, high solid coatings.

**Special Coating** — Components may be ordered in factory approved special high solid baked coating — add 8% to price of unit + \$1219 set-up & mixing charge per color per order. **Note:** written factory approval must accompany your order.

## filing and storage

### product overview

**Vertical Files** — With a track record of dependability that spans well over half a century, these rugged steel files feature 6 vertical uprights, 14 GA. tie bar gussets that maintain strong, straight drawer openings, full suspension cradles, 8 steel wheel roller bearings and 2 steel idler bearings per drawer, satin brushed aluminum hardware, and standard thumb latches.

**Lateral Files** — S Series and P Series Lateral files offer comprehensive solutions for a variety of office filing situations while maintaining a beautiful and consistent appearance. Whether beneath a work surface, within a project center, or in a group of central files, the clean lines and durable construction create a balance of form and function that remains consistent throughout the entire office. While a handsome addition to any office, these well-designed files retain their value by remaining completely scalable to a growing office — start with personal filing, add volume with a bank of files, expand their function with overhead storage, create workstation enclosures, add counters complete with laminate tops — as the filing needs of your office grow, the functionality of these lateral files grows right with it.

### lateral file drawers and roll-out shelves

All McDowell-Craig lateral file drawers and roll-out shelves operate on steel roller ball bearings that allow for full extension and maximum accessibility to contents. 4 and 5 drawer files have torque plates to ensure squareness and straight drawer openings. A variety of drawers and / or shelves are available; additionally, different drawer and / or shelf arrangements may be made in the field at any time — including the addition or removal of receding doors. All McDowell-Craig lateral files are engineered to be moved fully loaded.

### finishes

**Standard Enamel** — All McDowell-Craig files are available in a variety of color coordinated, high solid baked enamel finishes. *See McDowell-Craig Enamel Selection Guide.*

**Special Enamel** — All McDowell-Craig files may be ordered in factory approved special high solid baked enamel finishes — add 8% to price of unit + \$1218 set-up and mixing charge per color per order. **Note:** *written factory approval must accompany your purchase order.*

### laminated tops

**Standard Tops** — Tops are banded or self-edged and available in a variety of wood grains and patterns. *See McDowell-Craig Plastic Laminate Selection Guide.*

**Special Laminates** — Tops may be ordered in factory approved special laminates — add 8% to price of unit + \$864 per laminate pattern per order. **Note:** *written factory approval must accompany your purchase order.*

### locks

McDowell-Craig files, pedestals and lockers are available with a central locking mechanism which controls all drawers and / or receding doors. For additional safety, all lateral files are equipped with an interlock mechanism which prevents more than one drawer or shelf to be opened at a time.

please specify:

- model number
- enamel color
- optional drawers (if applicable)

see also:

- lateral file accessories (page 204)
- over-files (page 206)

## S-series lateral file

S-series lateral files feature an interlock system which allows only one drawer to be opened at a time. Comes standard with brushed metal pulls and front-to-back letter filing – option DHF (see next page for other options).

**2 drawer lateral file –**

May be used alone, placed beneath 29" or higher worksurfaces or used to support worksurfaces.

Counterweights recommended for freestanding use (see page 207).
